GENERAL: This product is acrylic back-coated satin acetate. AB-775S demonstrates a superior punching property, excellent smoothness of hand, and fair resistance against fadeout of imprinting from repeated commercial washings and dry cleanings. This non-fray acrylic-coated acetate also withstands noticeable discoloration or deterioration from exposure to commonly used permanent press dry cleaners. The product is also non-fraying, highly resistant to shrinking or curling, and effectively resistant to degradation from rot, mildew, and perspiration.

AB-775S is available in cut to size sheets or rolls in width from one-half inch up and in wide linear yards. Roll sizes available up to 5,000 yards. Anticipated delivery is three to four weeks.
